

## **ACCOUNTING**

We believe that your accounting records should be the 'one source of truth'. And we don't wait until the end of the financial year to check in with you. The systems we use enable us to access ALL your accounts in real time. This is advantageous because:

- You can review monthly or quarterly and end-of-year results in an instant.
- Business decisions are made based on up-to-date data.
- It avoids double-handling data, saving you time and money.

CLOUD ACCOUNTING IS GOOD FOR BUSINESS

The cloud is a platform that makes data and software accessible online anytime, anywhere, from any device. It's scalable, cost effective and easy to use. We can help you decide whether a cloud accounting platform is right for your business and work with you to fully implement the change, including on-site staff training. Cloud accounting can assist you in many ways, including for example:

- Automatic bank feeds.
- Online invoicing.
- Payroll tax and capital gains.
